

## WHO ARE WE?

Schools, businesses and families with a passion for promoting healthier lifestyles and supporting our local economy are excited to offer this innovative approach to school fundraisers. This fundraiser is in its ninth year and includes twelve schools (participating schools are listed at [farmshed.org](http://farmshed.org)). We hope for continued growth in Portage and Wood County schools.

## WHY BUY LOCAL?

Buying local food helps our children know where their food comes from, what farm fresh produce tastes like and how it is grown. Buying local food also helps our community's economy, rather than sending our money elsewhere.

# HOW IS THIS FOOD GROWN?

There are many different ways of farming, so the symbols below let you know how the products in our fundraiser are grown. Our food choices affect how land is managed. Buying grass-fed beef helps protect green pastures, while purchasing maple syrup helps protect forests. Growing practices affect farmers' earnings, as well as the health of the environment and the people who live in it.

## PESTICIDE USE

Pesticides are used to kill or control weeds, insects and fungi. If pesticides are not applied, they don't enter water, air or people.

No Pesticides

Only pesticides allowed under USDA organic standards

Integrated Pest Management to minimize use and toxicity of pesticides

## FERTILIZER USE

Synthetic fertilizers are made with natural gas, dissolve quickly in water and can enter our groundwater and wells.

No synthetic fertilizers

Less than 50% synthetic Fertilizers

## WATER CONSERVATION

While water is plentiful in most parts of Wisconsin, groundwater drawdowns have occurred in some parts of the state.

Large effort to conserve water

Some effort to conserve water

## ENERGY CONSERVATION RENEWABLE ENERGY

Wisconsin has no sources of coal, petroleum or natural gas. Wisconsinites spent over 23 billion dollars for energy in 2008, a drain to our economy.

Large effort to conserve energy or use renewable energy
